Office Action Summary

Art Unit 1771

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 24-26, 32-35 and 39-48, drawn to a rotatable label, classified in Class 428, subclass 343.

~~sheet~~
^{tab} II. Claims 27-31, drawn to a label having a release ~~sheet~~, classified in Class 428, subclass 40.1.

2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects. (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have a substantially different structure such as Group II requiring the presence of a shell and also the presence of a release tab, neither of which are required by the claims of Group I, and furthermore not requiring the preamble limitation that the claimed article is rotatable.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

Art Unit 1771

5. A telephone call was made to Susan Yee on April 30, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
